### Mexicans Hang Judas Iscariot With Great Glee As An Easter Ceremony

-After the sorrow of a Lea-

ten season, bathed in blood,

Mexico City will calebrate Easter Sunday as the gayest day of the year.

There will be a great bull fight in the

Plata de Toros, the theaters will have

These Judas figures are made as ugly possible. They have ropes attached them and they are dragged about

the streets.

They are knocked about this way and that until their owners think they have sufficiently shown their disgust and contempt. They are then taken up and

nuns or sisters of Christ clad in black as in some others of the Spanish American republics.

This great break between church and state originated before the time of President Juarez, but it was just put in force by his in 1867. At that time all of the church property was consiscated and all of the members of the religious societies, fram the Jesuits to the Sisters of Charity, who taught in the schools and served as nurses in the hospitals, were sent out of the country. For a while even the ringing of the church belix was problisted by law, and all religious parades outside the churches were forbidden. Since then many of the priests and numbers of the church belix was problisted by law, and all religious parades outside the churches were forbidden. Since then many of the priests and numbers of the church belix was problisted by law, and all religious parades outside the churches were forbidden. Since then many of the priests and numbers of the church scand a large number of the educational institutions are now again conducted by the nums, although their work is kept in the background.

The long gown and clerical hat are not seen on the streets, but one can easily tell the priests by their suits of black, broadcloth, their high cravats, straight cellars and tall silk hats, while the nums are easily known from the black gowns and the somber than a million dollars. This was generations ago. The sacred picture reposed for a time in the cathedral in Mexico City, but later on it was brought to this church, and it may now be seen on its altar. I have a photograph of it which was recently made by Waite, the American photographer of the church they were over their Phara de Toros, the theaters will have matiness and night performances and Judas will be him again and again by the children and grown ups in all parts of the city. This hauging of Judas is a regular Easter celebration. It was originated by the indians, to give them a chance to vent their rage upon the traitor to Christ, and it is still so used in the more ignorant back districts, although in the cities it has become a mere show for the children. Here at the Mexican capital images of Judas, made in all shapes and sizes, are peddled about the streets in advance of the celebration. They range in price from a few cents to a number

The long gown and clerical hat are not seen on the streets, but one can easily tell the priests by their suits of black; broadcloth, their high cravats, atragent cellurs and tall slik hats, while the nuns are easily known from their black gowns and the somber shawls which they wear over their lie ads. As to the religious processions, they have been practically abolished. A priest who defied the law not long ago was arrested in his clerical robes and east into prison. The archbishop of Mexico recently called attention to these laws and forbade the encouragement of the superstitions of the including imitations of the crucifixion and the celebrations of the punishment of the ensules and executioners of Christ a price from a few cents to a number of dollars, the larger ones being often illed with firecrackers and other explosives, which go off and blow Judas black; broadcloth, their high crawats, straight cellurs and tall silk hist, while the nums are easily known from the it black; govens and the somber shawls which they wear over their heads. As to the religious processions, they have been practically abolished. A priest who defied the law not fong allow was arrested in his derical robes, they have been practically abolished. A priest who defied the law not fong allow a content of the superstitions of the ministration to these laws and forbade the encouragement of the superstitions of the punishment of the superstitions of the punishment of the celebrations of the punishment of the celebrations of the punishment of the encourest and they crawl up the hill on their knees to visit it. The railrond of the celebrations of the punishment of the conquest, and their religion of the with have come down from the days of Montecum, and the three were the Pausion Play is sill celebrated it is not long since many of the churches had a ceremony of washing the beggars feet. This occurred on Holy Thursday, when 12 of the oldent beggars of the parish were given scats near the altar. An attendant then brought water in a basin, and the priest, taking off the sandals of the beggars which were given beggars. I was a strong hold of the washing and it was the feet of priests and not hose of beggars which were weathed.

At the Surue of Guadalupe. contempt. They are then taken up and hung. Sometimes a rope is stretched across the street, from the second atory windows of the houses on the opposite sides, in such a way that Judas hangs from the middle, and at others a flug staff is put out with Judas at the end of it. Both children and grown-ups mob the effigy, throwing stones at it, or pelting it with mid.

Some of these Judas figures are stuffed with candles and presents for the children, but in such cases they are usually hang inside the patios or courts of the houses, where the little ories can keep the sweets for themsel/es. There are also merchants who hang

can keep the sweets for themselves. There are also merchants who hang Judases above their stores, the figures being filled with petty articles of one kind or other. When the explosion occurs, the contents are scattered over the sidewalk, and the crowd figh'ss for them, the whole serving as an advertisement for the establishment which furnishes it.

Lent in Mexico.

Easter Sunday is very popultar here on account of the right way in which the Mexicans celebrate Lent. During that time all festivities are probibited. The church will not perform the ceremonies of marriage, and all of the women put off their fine clothes and wear only black. Even the churches are clad in black and the gorgaeous altars have sable mantles over their beautiful decorations of gold, silver and lace. Every good Christian is supposed to go to church, and all of the women and the indians do so. The church bells ring from morning till night and they awaken me before daybreak by their din.

This continues until Palm Sunday, when the indians bring in palms by the thousands and crosses, weren of palms, are everywhere sold. Some of these crosses are from six to ten feet in length and some are so small that you can wave them in your hands. Some are not more than 'two inches wide, being made of the finest fibers of palm. Others are of the whole leaves and often a single large palm cross will sell for \$5. These palms are blessed by the priests and are carried home to be tied to the front balconies, there to remain sixtil the next Palm Sunday.

Good Friday has its own special ser-

Lent in Mexico.

Good Friday has its own special ser-

lent prayer. The last of the ceremonles occur Saturday morning, when the
sciours will sing the "Gioria" to organ
accompaniments. At the same lime the
black draperies will be stripped from
the altars and the bells will be rung.
After this the gaicties will commence
and Easter will practically begin.

Government and the Church.
The Mexican government now insists
that there shall be an absolute separation of church and state, it prohibits
church processions throughout the
country. No one is allowed to wear
clerical garb on the street and you
do not see manks with tensured heads,
wearing sandals and long gowns, or

or other, and you will find no village which is celebrated by the Greek church is celebrated by the Greek church every Easter in front of the Church of the Holy Sepulchre at Jerusalem. I have seen the Intrar ceremony, but in that case the Greek patriarch and his assistants did the washing and it was the feet of priests and not those of beggars which were washed.

At the Shrine of Guadalupe.

One of the hest places to see how earnest the indians are in their worship is at the Shrihe of Guadalupe, situated about three miles from the Cathedral of Mexico City. The place may be reached by street cars. I have spent acveral days in moving about through the thousands of indians who come there to worship. The shrine is based upon a miracle, said to have been performed by the Virgin Mary, about 400 years are. It was one bright to worship at a church farther on, that the request a confiscation it had properly amounting to years are at the required in heariff every city I visit. The church is supposed to be enormously wealthy. At the time of the confiscation it had properly amounting to years are the request of the required in heariff every city I visit. The church is supposed to be enormously wealthy. At the time of the confiscation it had properly amounting to years are the required to the required

The church is supposed to be enory mously wealthy. At the time of the confiscation it had properly amounting to \$200,000,000, and it then owned almost 9000 estates which were values at millions. It had more than 22,000 lots here in Mexico City which alone were worth over \$100,000,000, and it had properly scattered here and there throughout the republic. When Juarez put the law of confiscation into effect a great part of this property was put up at auction and sold to the highest bidders, but it is said that those who bought risked the disfavor of the church, and that many took over the properties and held them in trust so that the church got them back. Others gave to the church the difference between the auction price and what the property would have sold for under other conditions and in this way the church has regained much of its millions. By the new law marriage was only valid through a civil contract, but no welltodo woman in Mexico will consent to a wedding unless she is also married by the church, and no priest would give this blessing to a family who had acquired church property unless some restitution was made. Today the ownership of the church is such that the pray in favor of holding together the great estates in Mexico is known as the church party or Catholic party, and there is no doubt but that the church has enormous wealth, in one form or other.

Churches Worth Millions.

I do not know how much has been spent in church building in this re-

known as the church party or Catholic party, and there is no doubt but that the church has enormous wealth, in one form or other.

Churches Worth Millions.

I do not know how much has been spent in church building in this republic, but the sum must ron high into the hundreds of millions. The Catholic religion came here just 25 years after Columbus discovered the new world, and the early Spaniards pridad themselves on their support of the church. A goodly share of all the gold and all-wer that was taken out of the mines was denated to religion, and every cathedral was a treasure vault filled with ornaments of silver and gold. There is a church at Chiunhua which was built through a tax of 25 cents on every pound of silver produced in that neighborhood, and this church cost \$600,000. In Zacatecas the cathedral was erected out of a tax levied on the silver mines under the city: and its income was so great that Europe was ramacked for pictures and ornaments to decorate it. It has a font of solid silver, which cost more than \$20,000, and in Spanish times the church was ablaze with gold and silver candelabra and with cloths of woven gold. Another church in Zacatecas had an altar of gold, and one at Quertaro had a gold altar which was burned by the French. The Spaniards gave their jewels and gold to decorate the cathedral at the Mexican capital, and they prevented ornaments worth about \$2,000, while the cathedral itself cost an equal amount to build.

There is a cathedral at Puebla which cost a million and a half and in which \$100,000 has been spent on the altar. It is said to be the most beautiful church on the continent. Guadalaira has a cathedral covering about an acrewhich was completed about \$20 years ago. It has been almost destroyed by carthouskes in the past, and it may go down again by the earthquiekes, which are now common in that vicinity. The dome of that church was once shattered by lightning and them the best of the Eaphiston and thundred for the same only several hundred and the members of their churches

### MINING NEWS

Inspiration Development Is Pushed; 360 Men Employed; Strikes in Iron Cap

Globe, Ariz, March 22.—At the Superior and Boston, two drifts are being driven east and west on the sixth level. The drift west is in 35 feet, the one east 45 feet, with full faces of ore in both drifts. The vein is over 40 feet wide and is ore bearing for the entire distance, with 15 feet of ore that averages better than seven per cent along the footwall side, and 25 feet of ore on the hanging that will probably run two and one-half to three per cent copper. The ledge is a big, strong, wide, permanent ledge. The sixth level east drift will connect with the raise from the eighth level in about 60 feet. The ore still continues in the raise and will average better than seven per cent copper. A car or ore per day from the raise and the sixth level drifts is being shipped to the El Paso smelter. It is proposed to continue the cross cut on

shipped to the Bi rase smeiter. It is proposed to continue the cross cut on the fourth level to strike the ledge. This cross cut will serve mainly the two purposes, first the determination of the height of the ore body, and second, to provide ventilation.

The cross cut on the 16th and 12th levels should encounter this vein within the next two or three weeks. Mining conditions are excellent and further developments may be confidently expected. J. A. Thomas, mining engineer, formerly in the employ of the Old Dominion, has made an exhaustive examination of the property and has reported favorably. He will continue to advise regarding further development. Thomas was selected by Lake Superior share holders.

Inspiration Development.

The Inspiration Consolidated Copper company's development for February amounted to 5,220 feet for the Inspiration division and 600 feet for the Live Oak division, a total of 5,820 feet, showing an increase of 520 feet for the Inspiration division, and 110 feet for the Live Oak division and 110 feet for the Live Oak division over the January footage. At the Inspiration division a total of 20,400 tons of ore was mined, of which 9000 tons were hoisted at the Joe Bush shart. At the Live Oak division 2,430 tons of waste and 270 tons of ore were hoisted at Live Oak No. 2 shaft, and 2,100 tons of waste at Live Oak No. 1 shaft. A total of 260 men are employed under the mining department, 200 at Inspiration and 60 at Live Oak.

General manager B. Britton Gotts-Inspiration Development.

and 60 at Live Oak.

General manager B. Britton Gottsberger, of the Malmi Copper company, who was operated on for appenuicitis and later for an abcess of the right lung, is slowly recovering. J. Parke Channing is still at the property, having taken charge during the illness of Mr. Gottsberger. The further development of the ore body is being carried on by two churn drills and diamond drilling. The site for the new lumber yard and warehouse which is being constructed, necessitates a fill of 2,000 cubic yards. uble yards

At the Southwestern Miami, drilling is progressing steadily and the manaxement expresses complete satisfaction with the results of the past developments. Hole No. 4 is now 755 feet deep, No. 11 is 870 feet deep, and No. 14 is 500 feet deep. All three holes are bottomed in schipt. Southwestern Miami.

Two Strikes at Iron Cap.
At the Iron Cap, general manager P A. Woodward reports two important strikes within the last week. While raising from the 800-foot level to the 650-foot level a good ledge of ore was encountered. Assays give returns of between all and control level a good ledge of ore was encountered. Assays give returns of between six and seven per cent copper. Drifting on the 650-foot level has tiselesed 35 feet of ore with ore still hawing in the face. The ore is in the saure of carbonates, black oxides, and some glance averaging from six and me-half to seven per cent copper, 49 to 56 per cent iron and 12 to 20 per ent insolubles. Shipments are being made at a rate of a car a week to the El Pase smeltery.

made at a rate of a car a week to the El Paso smeltery.

Work at Hlack Warrior.

At the Elack Warrior work is being carried on at a steady pace. Shipments are being made at the rate of about 100 tons of ore per day to the El Paso smeltery. The ore is of a siliceous character and runs about seven per cent copper. The force of men, which was recently curtailed on account of had weather, has again been increased to its normal number of 50. The new inspiration spor running to the site of the main inspiration shafts, passes within a hundred feet of the Warrior are bins, and if satisfactory shipping concessions can be arranged, should materially increase the shipping capacity of the Warrior company.

Jahns to Resume.

The Jahns Mining company which is

capacity of the Warrior company,

Jahns to Resame.

The Jahns Mining company, which is located about 12 miles west of Miami, is soon to resume active operations. The property is located in a highly faulted zone, showing lead silver, gold and copper values. The country rocks consist of limestone, quartrites and granite, which has been shattered to a considerable extent by large intrusions of diabase. The group consists

of 32 claims, being hordered by the Continental on the northeast and Castle Dome on the east. H. Jahns is general manager of the company, and is now at the avenuaty.

general manager of the company, and is now at the property.

The shaft of the new state company, in which a high-grade ore was encountered last year, and which was the cause of much favorable comment. cause of much favorable comment throughout the district, is reported to have been sunk on patented ground of the Continental group. The Continen-tal group is the property of the Old Dominion. Old Dominion's option on the adjoining property to the Contin-ental, the Castle Dome, expired on the first of this month. The option was for \$200,000.

To Instal Oil Burners.
The Gibson Copper company, which of late has been curtailing its output, on account of lack of fuel caused by the recent stormy weather, is soon to instal oil burners. The fuel used at present consists of wood hauled by present consists of wood hauled by Mexican woodchoppers from the Pinal mountains. Development is daily exposing and materially increasing the present ore reserve. It is reported that the high tension power line that is being strung from Roosevelt to Superior may be stepped down and utilized at the Gibson camp thus reducing the present cost of production to a greatly lower point.

At the Old Dominion ore reserves are being constantly increased and experiences.

are being constantly increased and ex-tensive developments are being carried on at different points on the property. Late shipment of steel is retarding the construction program of the new ad-Ruckeye, one of the outlying properties of the Old Dominion, which as yet has made no underground connections with the older workings of the property, one shift of ten men is working,

bins, of the company, left over the Pecos Valley Southern for Saragosa. An assay house has been built at the mine, 12 miles from Saragosa, and the company, through Mr. Kohlmeyer, will do its own assaying. Up to date work at the mine has been done by Mexicana, and has consisted chiefly in the converting of the round four foot hele into a 5 1-2 by 19 1-2 shaft. The shaft has been pushed to a depth of about 40 feet, but there still remains about 20 feet of clay and light formations before the first of the gold bearing strata will be encountered.

It is thought that within three weeks the shaft will be shaped up for the entire 90 feet of its depth, and that real development work will begin A whim hoist has been ordered to supplement the windlass now in use, and with Mr. Kohlmeyer to push the work through two shifts a day, the management believes that progress will be erty, one shift of ten men is working, lifting a raise and drifting.

Small Force at Keystone.

At the Keystone, nine men are employed retimbering and cleaning out the main drift connecting the lower workings of the property with the surface. Especial attention has been given to the retimbering of the various workings and the workings are in excellent shape thromphout the mine cellent shape throughout the mine

#### MINE ROAD SOLD: TO BE DISMANTLED

Savanna Company Begins Work of Sinking Shaft in Burra Mountains; Extensive Work Planned.

Silver Cliv, N. M., March 22—Joseph Michaels, of Chicago, and Harry Benjamin, of St. Louis, representing an easiern syndicate, have bought the narrow gage railroad running from the Silver Cliv smelter to the mines in the Pinos Alios mountain, the price paid being withheld. The road was built about seven or eight years ago at a cost of \$269,000, and is a little over 22 miles in length. It was owned by the Savanna Copper company.

in length. It was owned by the Savanna Copper company.

The Pinos Altos end of the line is
about 2500 feet higher than the Silver
City end, the road winding around the
smountains making its length as stated,
whereas the distance by wagon road is
a little less than nine miles. The motive power consists of donkey engines,
the working parts of which drive the
engines with cog wheels.

Just what the purchasers intend to
do with the road has not been given
out, but it is believed certain that the
work of dismantling will begin at once
under the supervision of Jerome J. Benjamin, who is here to begin work. The

under the supervision of Jerome J. Banjamin, who is here to begin work. The
work of tearing up the road will begin
at the Pinos Allos end, the motive
power being used to haul the material
to Silver City as the work progresses.
The men interested in making the purchase are here, but refuse to give
out just what will be done with the
material. The only thing certain is that
the road has been sold to the parties
named and that it will be dismantled.

The company has begun the work of
sinking a shaft to be 700 feet deep on
its property in the Burro mountains.
When completed, laterals will be run to
determine the extent of the ore body
and indications are the company will mine on a large scale.

#### INTEREST REVIVED

IN TOYAH OIL FIELD Pecos, Texas, March 22.—interest is being taken here in the Toyah oll fields, just now. Since the passage of the recent mineral act in the legislature, numerous prospectors and oil men have been seen both in Pecos and Toyah, and on the oil fields as well. It is said that representatives of some of the nation's largest companies, the Texas company, among others, have had representatives on the ground looking after their interests.

There has been a strong undercurrent of interest and activity, even among the most conservative of the local men, too, and it is beginning to look like the concerns that shut down some time ago told the truth when they said that they were waiting for more favorable legislation.

#### LOWER CALIFORNIA MINES INUNDATED

Guaymas, Son, Mex., March 22.—T. Draper, manager of the Sirena Geld Mining company, is in the city from Santa Rosalia. Mr. Draper states that Lower California is absolutely peaceful; that all or his men are working in the mine unminiful of the disturbances existing on the mainland, and that considerable are is now piled on the beach awaiting an opportunity to
